INTERNAL RISK FACTORS

- 1. We are in at a nascent stage in a fast-evolving dynamic industry. If our services do not gain market acceptance, our operating results may be negatively affected.**

The Company is engaged in business of providing services relating to digital marketing. This is a high-growth potential sector with rapidly evolving requirements from customers. While this presents long-term growth potential, we need to maintain a high pace of innovation that ensures our customers are getting a strong value potential. If we are unable to develop new or sufficiently differentiated services, enhance our support services in a timely manner or position and price our services to meet demand including in response to new industry standards, customers may not subscribe our services.

If the markets for our services fail to develop, develop slower than expected or experience increased competition, our business may suffer. As a result, we may be unable to successfully market our existing services, develop and successfully launch new services and enhancements to existing services, complete customer requirements on a timely basis, or complete services currently under development. If our services are not accepted by our customers or by associated businesses in our target verticals and markets, our business, operating results and financial condition will be materially adversely affected. For further details regarding our business, please refer to chapter titled "Business Overview" beginning on Page 106 of this Draft Red Herring Prospectus.

2. *Our company has partnerships with large platforms. Any change in these partnerships which are beyond our control can affect our business operations.*

The Company through its subsidiary company i.e. Cyber Media Services Pte Ltd, registered in Singapore has entered into long-term relationship with Google Asia Pacific Pte Ltd. as a Google Publishing Partner which also sheds light on our increasing focus on international markets. Any change made or termination by Google to the partnership may have an impact upon operations of the company. Also our company is adhering to the terms and conditions as specified in the arrangement with Google Asia Pacific Pte Ltd., any violation of terms and conditions will majorly impact revenue of our Company.

Furthermore, the entire ecosystems may face variations based on changes that are made by Google, Facebook, Apple, Amazon or similar platforms in the ecosystem. This could present short-terms shocks to the business. However, over eight years we have built a fair degree of experience in managing such exigencies. The Company also works with several large MNCs and several large advertising agencies for its advertising business. It has a high percentage of repeated clients, and therefore de-risked its revenue by focusing on relationships than just concentrating on orders.

For further details regarding our business, please refer to chapter titled “Business Overview” beginning on Page 106 of this Draft Red Herring Prospectus.

4. *The Company has entered into a new business of programmatic/data analytics which may impact growth and profitability. If it is not successful in the market, then it may hamper the growth of the company.*

The digital ecosystem offers a wide array of opportunities. The Company prides itself in entering into new areas, learning fast, making appropriate strategies and executing them successfully. It has been an early mover in the programmatic digital and data analytics. The Company understands that the margins in advertising campaigns and publisher inventory are limited as per prevalent industry norms on agency commission structures. It has therefore branched into programmatic solutions and data analytics, both of which are high margin businesses. If our new services are not accepted by our customers or by associated businesses in our target verticals and markets, our business, operating results and financial condition will be materially adversely affected.

6. If there are instances of failures of our information technology system, the services we provide could be delayed or interrupted, which could have an adverse effect on our business, results of operation, cash flows and financial condition.

We are heavily dependent on our IT system, which may include third-party infrastructure. To successfully operate our business, we must be able to protect our IT system from interruption, including from events that may be beyond our control. Events that could cause system interruptions include, but are not limited to, fire, natural disasters, unauthorized entry, power loss, telecommunications failure, computer viruses, malicious codes, terrorist acts and war. Significant problems with our IT system, such as telephone or IT system failure or cyber security breaches, could halt or delay our ability to service our customers, hinder our ability to conduct and expand our business and require significant remediation costs. Any of these events could have an adverse effect on our reputation, business, results of operations, cash flows and financial condition.

We cannot be certain that any measures we have taken to prevent system failures will be successful or that we will not experience service interruptions. We may also come under additional regulatory scrutiny or be the target of enforcement actions, or suffer monetary losses or adverse reputation effects. All of these may have an adverse effect on our business, results of operations, cash flows and financial condition.

For further details regarding our business, please refer to chapter titled “Business Overview” beginning on Page 106 of this Draft Red Herring Prospectus.

7. Our marketing and advertising campaigns may not be successful in increasing the popularity of our offerings. Also ineffective marketing initiatives, may adversely affect our business and results of operations.

Our revenues are influenced by our marketing plans including advertising. If we adopt unsuccessful marketing and advertising campaigns, we may fail to attract new customers or retain existing customers. If our marketing and advertising strategies are unsuccessful, our business and results of operations could be materially adversely affected. To mitigate this, the Company has an internal quality control business to ensure that no false advertisements are carried. It also monitors the digital inventory available to it to profile that proper traffic is coming to the site. Also the support of our employees is critical for the success of our marketing programmes, such as local marketing and any new strategic initiatives we seek to undertake. While we can mandate certain strategic initiatives, we need the active support of our employees if the implementation of these initiatives is to be successful. The failure of our employees to support our marketing programs and strategic initiatives could adversely affect our ability to implement our business strategy and harm our business, financial condition, results of operations and prospects.

In addition, increased spending by our competitors on advertising and promotion or an increase in the cost of advertising in the markets in which we operate, could adversely affect our results of operations and financial condition. Moreover, a material decrease in our funds earmarked for marketing and advertising or an ineffective advertising campaign relative to that of our competitors, could also adversely affect our business and results of operations.

For further details regarding our business, please refer to chapter titled “Business Overview” beginning on Page 106 of this Draft Red Herring Prospectus.

8. We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may affect our operations.

We require certain statutory and regulatory approvals, licenses, registrations and permissions, and applications need to be made at the appropriate stages for our business to operate. Although we believe that we have obtained required licenses for carrying out our business activity. There can be no assurance that the relevant authorities will renew these approvals or licenses in a timely manner. As a result, we may not be able to execute our business plan as planned. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Government approvals, licenses, clearances and consents are often also subject to numerous conditions, some of which are onerous and may require significant expenditure. Also our Company is in process for applying the Shop and Establishment license for operating from Corporate and Branch Office.

Furthermore, approvals, licenses, clearances, and consents covering the same subject matter are often required at State and Central Government levels. If we fail to comply, or a regulator claims that we have not complied, with any of the required conditions, we may not be able to commence or continue with work or operate these projects. For further information on various approvals or licenses required in connection with our operations, please see the section entitled “Government and other Approvals” on page 179 of this Draft Red Herring Prospectus.

9. *The Company's income may vary from quarter to quarter and may not be predictable, thereby affecting the financial performance of the company.*

Our company's financial position varies from quarter to quarter due to change in external and internal environment. For example, the advertising industry does follow a cyclical nature where Q3 (October - December) months enjoy high ad spends due to festivals such as Diwali, Dussehra, Christmas and New Year. Furthermore, there may also be quarterly impacts based on changes incorporated by large platforms such as Google, Facebook, Amazon, among others. The Company tries to ascertain these variations well in advance, and take necessary precautions to protect the business against such changes. Through experience, the Company has created a good track record of effectively bouncing back from such changes.

Indeed, the revenue of the Company was also impacted when the Covid pandemic hit the world, however it recovered in a short span of time and has then continued to grow very rapidly. Infact, Covid has given a push to digital offerings, a transition that may have taken many more years otherwise. This clearly shows that the strategy of the Company to work with several partners, suppliers and channels ensures low unpredictability on quarter-to-quarter revenue and profitability.

For further details regarding our business, please refer to chapter titled "Business Overview" beginning on Page 106 of this Draft Red Herring Prospectus.

10. *Our corporate office and registered office are located on the property taken on lease from our promoter and shareholder.*

The corporate office of our Company is situated at Cyber House, B-35 Sector- 32 Gurugram-122001, Haryana, India and registered office is situated at D-74, Panchsheel Enclave, New Delhi-110017, Delhi, India. The corporate office has been taken on lease from our promoter and shareholder M/s Cyber Media (India) Limited through Lease Agreement dated July 15, 2021 starting from the July 01, 2021 for a period of 11 months. The agreement is valid through May 31, 2022. The Registered office is owned by our promoter Mr. Pradeep Gupta along with his relative and Memorandum of Understanding dated February 28, 2022 has been entered into with them for use of their premises by the company.

There can be no assurance that renewal of lease agreement with the owner of the property will be entered. In the event of non-renewal of agreement/ termination of MOU, we may be required to shift both of our offices to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one. For further details regarding our leased premises, please refer to chapter titled "Business Overview" beginning on Page 106 of this Draft Red Herring Prospectus.

11. *The shares of our Promoter company were suspended from being traded on the BSE and NSE due to Default in Payment of Annual Listing Fees and also incurred loss in previous years. Any such failure on part of our company could affect our business and future prospects.*

Our Promoter Company i.e., Cyber Media (India) Limited is listed on both the stock exchanges i.e., NSE and BSE. The shares of the company were suspended w.e.f. March 12, 2020 from being traded on both the exchanges due to default in payment of annual listing fees following the outbreak of Covid. The suspension was revoked w.e.f. December 16, 2020. Any such failure on part of our company will hamper the growth of business.

Additionally, our promoter company had made significant losses in its international operations in the past. It has reported a net loss of Rs. 34.72 Lakhs and 2,651.86 Lakhs (including an one-time exceptional amount of Rs. 2,595.35 Lakhs) respectively in the financial year 2021 and 2020. Although our company has not incurred loss but while consolidating the financial statements with the parent company, the overall position is negative which affects the business and financial operations of our company.

For further details of our Promoter Company, please refer to chapter titled "Our Promoters and Promoter Group" beginning on page 142 of Draft Red Herring Prospectus.

12. *We may need to change our pricing models to compete successfully.*

The competition we face in the sale of our services and general economic and business conditions as well as changes in the IT industry standards and landscape, can put pressure on us to change our pricing models. If our competitors offer deep discounts on certain services that the marketplace considers more valuable, we may need to lower prices or offer other favourable terms in order to compete successfully. Any such changes may reduce our sales or margins and could adversely affect our business and operating results.

Our competitors may offer lower pricing for digital marketing and research services, which could put pressure on us to further discount our services. Any broad-based change to our prices and pricing policies could cause our revenues to decline or be delayed as our sales force implements and our customers adjust to the new pricing policies. Some of our competitors may bundle services

for promotional purposes or as a long-term pricing strategy or provide guarantees of prices. These practices could, over time, significantly constrain the prices that we can charge for some of our services.

In order to mitigate this, we are investing in technology that creates deeper engagement with our customers, our focus would include increasing value-add services to attract more customers, while increasing price-independent competitiveness.

For further details regarding our business and competition, please refer to chapter titled “Business Overview” beginning on Page 106 of this Draft Red Herring Prospectus.

13. We derive a significant portion of our revenues from our top ten customers approximate to 86.87%. The loss of, or a significant reduction in the revenues we receive from, one or more of these clients, may adversely affect our business.

Our top ten customers contribute approximately 86.87% of our revenues for the period ended December 31, 2021. Any change in the demand for our services by these customers and growing competition may affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, from these customers. Loss of business from one or more of them may impact affect our revenues and profitability.

However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering technology solutions and improved services to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

For further information of our ten top customers, please refer chapter titled “Management’s Discussion & Analysis of Financial Conditions & Results of Operations” beginning on Page 152 of this Draft Red Herring Prospectus.

14. There have been some instances of delays and non-filing in the past with certain statutory authorities and non-compliances with certain provision of statutory regulations applicable to us. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

In the past, there have been some instances of delays in filing statutory forms with the RoC such as DPT-3 was filed under the CFSS Scheme, 2020 of MCA without any penalty and delay filing of MGT-14 which was filed after the order for condonation of delay u/s. 460(b) of the Companies Act, 2013. In addition to above, our Company has inadvertently filed incorrect Annual Returns with respect to the shareholding records, share transfer details, details of authorized and paid up capital etc. Although our Company is in process to making necessary rectifications with RoC in the Annual Returns for the respective years.

Further the Company has created charge in favour of State Bank of Mysore for Corporate guarantee issued to promoter Company i.e. Cyber Media (India) Limited which was later transferred to Pridhvi Asset Reconstruction and Securitization Company Limited (the financial Creditor) vide Restructuring agreement, but the transfer of charge to the financial creditor in record of RoC is still pending. Further Cyber Media (India) Limited has worked out a settlement plan with the financial creditor for payment of dues & made part payment of Rs. 5.70 Crores till March 31, 2022 as the settlement terms and balance will be paid on or before by the due date of July 31st, 2022. After payment of full amount, the charge created by our Company against Corporate guarantee will be satisfied with RoC.

Also we have not made the provisions for contingent Liability as per Ind AS 37 for Corporate Guarantee in our audited financial statement although the same is rectified in Restated Financial statement.

While no legal proceedings or regulatory action has been initiated against our Company in relation to such non-compliance and instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC as of the date of this Draft Red Herring Prospectus, we cannot assure you that legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by regulatory authorities in this respect. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same or in case any claim for gratuity matures, our business, financial condition and results of operations could be adversely affected.

15. We undertake Management and Consulting charges on digital marketing and our financial performance may be adversely affected by an inability to generate income from such activities.

The source of our revenue are the Management and Consulting charges on digital marketing, and the quantum of fees received from such services. The fees we charge to our customers can depend upon a number of factors that are, in part, within our control, which can include our overall business strategy, our expenses related to a particular transaction type, the volume of transactions etc. Further, they also depend upon a number of external factors, which can include general macro-economic conditions.

Competitive factors in particular, have and may continue to have an adverse effect on our ability to charge higher charges to improve our margins.

If we are unable to manage and plan for the factors within and out of our control, we may not adequately set our Management and Consulting charges structure to cover all or some of our costs or miss revenue generating opportunities, or even where adequately set, we may miss opportunities to increase volume, each of which may adversely affect our business, financial condition, results of operations and cash flows.

For further details regarding our business, please refer to chapter titled “Business Overview” beginning on Page 106 of this Draft Red Herring Prospectus.

16. Our ability to adopt new technology to respond to new and enhanced products poses a challenge in our business. The cost of implementing new technologies for our operations could be significant and could adversely affect our business, results of operations, cash flows and financial condition.

The industry in which we operate is subject to rapid and significant technological changes, with the constant introduction of new and enhanced services. As part of our business strategy, we intend to leverage our technological capabilities to service our customers. Our success will depend in part on our ability to respond to technological advances and emerging standards and practices on a cost effective and timely basis. We cannot assure you that we will be able to successfully make timely and cost-effective enhancements and additions to the technology underpinning our operational platform, keep up with technological improvements in order to meet our customers’ needs or that the technology developed by others will not render our services less competitive or attractive. In addition, rapid and frequent technology and market demand changes can often render existing technologies, requiring substantial new capital expenditures or write-down of assets. Our failure to successfully adopt such technologies in a cost effective and a timely manner could increase our costs and lead to us being less competitive in terms of our prices or quality of services we provide.

Further, implementation of new or upgraded technology may not be cost effective, which may adversely affect our business, results of operations, cash flows and financial condition. For further details regarding our business, please refer to chapter titled “Business Overview” beginning on Page 106 of this Draft Red Herring Prospectus.

17. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighbouring countries;
- occurrence of natural or man-made disasters
- prevailing regional or global economic conditions, including in India’s principal export markets; and
- Other significant regulatory or economic developments in or affecting India or its IT sector.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

18. Based on certain qualifications noted by our auditors, our Auditors have reported a qualification in respect to matters specified in Companies (Auditor’s report) order, 2016.

In connection with the audits of our Standalone Financial Statements, our Auditors have reported a qualification in respect to matters specified in the Companies (Auditors Report) Order, 2016, as amended, in the annexure to their audit reports for fiscal 2019 that our Company has undisputed amounts payable in respect of the TDS amounting Rs. 69.99 Lakhs, Labour Welfare amounting Rs. 0.99 Lakhs and GST amounting Rs. 93.52 Lakhs were in arrears as at March 31, 2019 for a period of more than six months from the date on when they become payable. In addition to above for fiscal 2021 that our Company has undisputed amounts payable in respect of the TDS amounting Rs. 30.15 Lakhs, were in arrears as at March 31, 2021 for a period of more than six months from the date on when they become payable. Further the same has been paid and there are no qualifications in the Auditor’s report on December 31, 2021

The existence of any non-compliance under statutory regulations in future could require costs and resources to remedy such deficiencies. The existence of such deficiencies could cause the investors to lose confidence in our reported financial information and the market price of our Equity Shares could decline significantly. If we are unable to obtain additional financing to operate and expand our business as a result, our business and financial condition could be adversely affected.

19. We have entered into and may enter into related party transactions in the future also.

Our Company, Holding Company and fellow subsidiaries has in the course of our business entered into, and will continue to enter into, transactions with related parties. Our Company has entered into several related party transactions with our Promoter and promoter group including in relation to reimbursements, loans and salary etc. For more information regarding our related party transactions, see “Financial Information of our Company” beginning on page 149 of this Draft Red Herring Prospectus.

We cannot assure you that we will receive similar terms in our related party transactions in the future. Further we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties and such transactions, individually or in the aggregate, will not have an adverse effect on our reputation, cash flows, business, results of operations and financial condition.

20. We have experienced negative cash flows in the past. Any such negative cash flows in the future could affect our business, results of operations and prospects.

Our Company had reported certain negative cash flows from our operating, investing activities and financing activities in the previous years as per the Restated Financial Statements and the same are summarized as under:

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may affect our business and financial operations. For further details, please refer chapter titled “Financial Information of our company” beginning on Page 149 of this Draft Red Herring Prospectus.

21. Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.

We have not declared dividend on our Equity Shares since last five years. Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Although the Company has declared the Bonus issue of shares in February, 2022. The declaration and payment of dividends will be recommended by the Board of Directors and approved by the Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act, 2013. As on date, our Company has not adopted any formal dividend policy. For further please refer chapter titled “Dividend Policy” beginning on Page 148 of this Draft Red Herring Prospectus.

We may retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders’ investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

22. *We have a substantial amount of outstanding indebtedness, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.*

As of December 31, 2021, our long term borrowings were ₹ 499.04 Lakhs & short term borrowings were ₹ 129.12 Lakhs and we may continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements; and
- Increasing our finance costs.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we may breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. For further details of our Company's borrowings, Please refer "Financial Information of our Company" on page 149 of this Draft Red Herring Prospectus.

23. *If we are not successful in managing our growth, our business may be disrupted and our profitability may be reduced.*

We have experienced sustainable growth in recent years and expect our businesses to continue to grow significantly. Our future growth is subject to risks arising from a rapid increase in volume, and inability to retain and recruit skilled staff.

Our future growth may place significant demands on our management and operations and require us to continuously evolve and improve our financial, operational and other internal controls within our Company. In particular, continued expansion may pose challenges in:

- maintaining high levels of quality control, cost effective manufacturing, and customer satisfaction;
- recruiting, training and retaining sufficient skilled management and technical personnel for our manufacturing process;
- developing and improving our internal administrative infrastructure, particularly our financial,
- operational, communications, internal control and other internal systems;
- making accurate assessments of the resources;
- adhering to the standards of health, safety and environment and quality and process execution to meet clients' expectations;
- strengthening internal control and ensuring compliance with legal and contractual obligations;
- managing relationships with customers, suppliers and lenders.

If we are not successful in managing our growth, our business may be disrupted and profitability may be reduced. Our business, prospects, financial condition and results of operations may be adversely affected.

24. *Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.*

As on Dec 31, 2021, our total secured borrowings amounted to Rs. 628.16 Lakhs from Financial Institutions. Our leverage has several important consequences, including the following:

- A portion of our cash flow will be used towards repayment of debt, which will reduce the availability of cash to fund working capital requirements, capital expenditures and other general corporate purposes;
- Our borrowing cost and the existence of encumbrances on a significant portion of our immovable properties may constrain. In the event of enforcement of an event of default in connection with such secured borrowings (which is not waived or cured), our ability to continue to operate our business at such locations may be restricted;
- Fluctuations in interest rates may affect our cost of borrowing, as all or a substantial part of our borrowings is at floating rates of interest; and
- Our financing agreements require us to submit audited annual accounts, quarterly accounts, CMA Data within the stipulated time and other conditions. Our failure to comply with financial or restrictive covenants or periodic reporting requirements or at all may result in declaration of an event of default by any current or future lenders, which may accelerate repayment or increase applicable interest rates or trigger cross-default or cross-acceleration under other financing agreements.

The termination of, or declaration or enforcement of default under, any current or future financing agreement (if not waived or cured) may affect our ability to raise additional funds or renew maturing borrowings to finance our existing operations and pursue our growth initiatives and, therefore, have an effect on our business, results of operations and prospects.

For further details of our loans, Please refer chapter titled “Financial Information of our Company” beginning on Page 149 of this Draft Red Herring Prospectus.

25. We do not own our trademark as on date of Draft Red Herring Prospectus. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights.

We do not own our trademark as on the date of Draft Red Herring Prospectus. However, we have applied for some of the registration of the same. As such, we do not enjoy the statutory protections accorded to a registered trademark as on date. There can be no assurance that we will be able to register the trademark and the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

For further details please refer to chapter titled “Government and Other Approvals” beginning on page 179 of the Draft Red Herring Prospectus.

26. We are subject to the risk of failure of, or a material weakness in, our internal control systems.

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. In addition, several of our collection related processes are yet to be fully automated, which may increase the risk that human error, tampering or manipulation will result in losses that may be difficult to detect. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

27. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

While we maintain insurance coverage related to our building, furniture, fixtures & interiors, we may not have sufficient insurance coverage to cover all possible economic losses, including when the loss suffered is not easily quantifiable and in the event of severe damage to our business. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy. Additionally, there may be various other risks and losses for which we are not insured either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition and cash flows.

The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have an effect on our business, results of operations, financial condition and cash flows.

28. Any increase in or occurrence of our contingent liabilities and commitments may adversely affect our financial condition.

As of December 31, 2021 our contingent liabilities as indicated in our restated statements are as follows:

Particulars	Amount (Rs. In Lakhs) as on December 31, 2021
Contingent Liabilities – Corporate Guarantee	1380.48
Other Commitments	--

Any increase in our contingent liabilities or occurrence of these liabilities may materially and adversely affect our financial position, results of operations and cash flows. For further details of our contingent liabilities, Please refer to section titled “Financial Information of our Company” beginning on Page 149 of this Draft Red Herring Prospectus.

29. We have significant on-going funding requirements and may not be able to raise additional capital in the future. As a result, we may not be able to respond to business opportunities, challenges or unforeseen circumstances.

Our major fund based and non-fund based financial assistance has been sanctioned by the bank, i.e. the Karur Vysya Bank Limited on the security of assets. The Company is dependent on the Karur Vysya Bank Limited for its Working Capital requirement and any default under such arrangement with such lender may create problem for smooth operations of the Company, which may affect the financial stability of the Company.

Additionally, this may result into difficulty in arranging for funds for re-payment and may also affect the financial position of the Company. If in future we are unable to generate sufficient cash flow from operations or borrow the necessary capital to fund our future capital expenditures, we will be forced to limit our growth. In addition, we may not be able to service our existing customers or to acquire new customers. The inability to raise additional capital on acceptable terms could have an effect on our business, results of operations and financial condition.

For further details of our loans, please refer chapter titled “Financial Information of our Company” beginning on Page 149 of this Draft Red Herring Prospectus

30. We have entered into contracts with some of our customers to provide them with services and with publisher for publishing the ads on their websites, hence termination of contracts may have an adverse impact on our business and financial operations.

Our services are sold through specific requirement of our customer and we have entered into any service agreements with some of our customers to provide our services. Each of our services is customized as per the requirements of our customers. Although we have placed strong emphasis on performance, adherence to scheduled timelines set by our customers and meeting their quality requirements, any change in their buying strategy could result in termination of service and could materially or adversely affect our business, profits and results of operations.

In addition to that we have entered into Google AdSense and AdX Account Management Agreement with various publishers for publishing ads on its website by using Google Ad Manager 360 (GAM 360) technology. The Agreement contains certain terms and condition in respect of revenue sharing, termination, services, etc. which are bound to be complied by our Company. Any non-adherence to the conditions of such agreements may impact the business and financial condition of our Company.

For further details of our business, please refer to chapter titled “Business Overview” beginning on Page 106 of this Draft Red Herring Prospectus.

31. The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.

The company’s operating results may fluctuate or adversely vary from past performances in the future due to a number of factors, many of which are beyond the company’s control. The results of operations during any financial year or from period to period may differ from one another or from the expected results operation. Its business, results of operations and financial condition may be adversely affected by, inter alia, a decrease in the growth and demand for the services offered by the us or any strategic alliances which may subsequently become a liability or non-profitable. Due to various reasons including the above, the future performance may fluctuate or adversely vary from our past performances and may not be predictable.

For further details of our operating results, section titled “Financial Information of our Company” beginning on Page 149 of this Draft Red Herring Prospectus.

32. Our registered office from where our operations are carried out is shared between our Company with our Promoter Company and Group Companies.

Our Registered Office situated at D-74, Panchsheel Enclave, New Delhi - 110017, is shared with our Promoter Company and group Companies. Any dispute arises in future between our Promoter Company and Group Companies, consequences to which we may have to change our registered office and place of operations from where we are presently operating. Also the change in registered office may adversely affect our business operations.

For further details of our properties, please refer to chapter titled “Business Overview” beginning on Page 106 of this Draft Red Herring Prospectus.

33. Our continued success is dependent on our Promoters, senior management and skilled manpower. Our inability to attract and retain key personnel or the loss of services of our Promoter or Managing Director may have an adverse effect on our business prospects.

Our Promoter, Managing Director and senior management have significantly contributed to the growth of our business, and our future success is dependent on the continued services of our senior management team. Our Managing Director Mr. Dhaval Gupta is having vast experience in this Industry which turned out beneficial for the Company. Also the critical decision in our Company are taken by Promoter which shows dependency on Promoter. An inability to retain any key managerial personnel may have an adverse effect on our operations. Our ability to execute contracts and to obtain new clients also depends on our ability to attract, train, motivate and retain highly skilled professionals, particularly at managerial levels. We might face challenges in recruiting suitably skilled personnel, particularly as we continue to grow and diversify our operations. In the future, we may also not be able to compete with other larger companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our senior management team, our whole time directors or other key personnel or an inability on our part to manage the attrition levels; may materially and adversely impact our business, results of operations, financial condition and growth prospects.

The success of our business is also dependent upon our ability to hire, retain, and utilize qualified personnel, including engineers, and corporate management professionals who have the required experience and expertise. From time to time, it may be difficult to attract and retain qualified individuals with the requisite expertise and we may not be able to satisfy the demand from customers for our services because of our inability to successfully hire and retain qualified personnel. For every new service we expand into, we require suitably skilled personnel.

34. We have not independently verified certain data in this Draft Red Herring Prospectus.

We have not independently verified data from the Industry and related data contained in this Draft Red Herring Prospectus and although we believe the sources mentioned in this Draft Red Herring Prospectus to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

35. Our operating results could be adversely affected by weakening of economic conditions due to lock-down in all parts of India and other parts of world due to pandemic covid-19, or similar unforeseen events.

Our overall performance depends in part on the global economic conditions. Certain economies have experienced periods of downturn due to the present situation prevailing in India and outside India due to pandemic disease of Covid-19 which impact financial markets, concerns regarding the stability and viability of major financial institutions, declines in gross domestic product, and increases in unemployment and volatility in commodity prices and worldwide stock markets, and excessive government debt.

Moreover, the instability in the global economy affects countries in different ways, at different times and with varying severity, which makes the impact to our business unforeseeable and indeterminate. During such downturns, many customers may delay or reduce digital marketing purchases. Contract negotiations may become more protracted or conditions could result in reductions in the sale of our services, longer sales cycles, pressure on our margins, difficulties in collection of accounts receivable or delayed payments, increased default risks associated with our accounts receivables, slower adoption of new technologies and increased price competition. Any of these events, as well as a general weakening of, or declining corporate confidence in the global economy, or a curtailment in government or corporate spending could delay or decrease our revenues and therefore have a material adverse effect on our business, operating results and financial condition.

36. We are susceptible to risks relating to unionization of our employees employed by us.

We cannot assure you that our employees will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher salaries and enhanced employee benefits. We also cannot assure you that we will not experience disruptions in our work due to disputes or other problems with our workforce. If not resolved in a timely manner, these risks could limit our ability to provide our services to our clients, cause clients to limit their use of our services or result in an increase in our cost of employee benefits and other expenses. If any of these risks materialize, our business, results of operations and financial condition could be affected.

For further details of our employees, please refer to chapter titled “Business Overview” beginning on Page 106 of this Draft Red Herring Prospectus.

37. Increases in manpower cost for IT professionals could reduce our cash flows and profit margins.

Historically, manpower costs in the Indian IT services industry have been significantly lower than manpower costs in developed countries for comparable skilled technical personnel, which has been one of India's competitive strengths. However, manpower cost increase in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. In the long term, salary increases may make us less competitive unless we are able to continue increasing the efficiency and productivity of our professionals and the quality of our services and the prices we can charge for our products and services. Increases in salaries, including an increase in the cash component of our compensation expenses, may reduce our cash flows and our profit margins and have a material adverse effect on our business, financial conditions and results of operations.

For further details regarding our human resources, please refer to chapter titled "Business Overview" beginning on Page 106 of this Draft Red Herring Prospectus.

38. If there is a change in policies related to tax, duties or other such levies applicable to us, it may affect our results of operations.

We benefit from certain general tax regulations and incentives that accord favourable treatment to certain of our operations as well as for our activities. These tax benefits include income tax deductions and other taxes. For details regarding income tax deductions, please refer to the chapter "Statement of Possible Tax Benefits" on page 94 of this Draft Red Herring Prospectus.

New or revised accounting policies or policies related to tax, duties or other such levies promulgated from time to time by the relevant authorities may significantly affect our results of operations. We cannot assure you that we would continue to be eligible for such lower tax rates or any other benefits. The reduction or termination of our tax incentives, or non-compliance with the conditions under which such tax incentives are made available, will increase our tax liability and affect our business, prospects, results of operations and financial condition.

39. Our Group Companies has incurred losses in the last three financial years. Any future losses to our Group Companies will impact the financial position of our Group.

The following Group Companies has incurred losses in the last three financial years:

Name of Group Company	Profit/(Loss) for the year ended (Amount in Lakhs)		
	31 st March 2021	31 st March 2020	31 st March 2019
Cyber Astro Limited	(5.94)	(24.19)	9.65
Cyber Media Services Limited	(0.93)	(44.63)	2.54
Cybermedia Digitix Limited	(0.87)	(0.86)	(0.76)

These are immaterial companies having no or negligible business revenues. And as of now they do not require any infusion of funds to continue their operations. These group companies have no revenue bearing on the Company.

We cannot assure you that our Group Companies will not incur losses in the future. For further details of our Group Companies, please refer to "Information with respect to Group Companies" on page 182 of this Draft Red Herring Prospectus.

40. Our business operations may be disrupted by an interruption in power supply which may impact our business operations.

Our operations involve a significant amount of power supply as our service process requires continuous supply of power. We depend on State electricity supply for our power requirements. An interruption in power supply may occur in the future as a result of any natural calamity, technical fault, and shortage of power or other factors beyond our control. This could also result in an increase in the cost of power. Lack of sufficient power resources or an increase in the cost of such power may adversely affect our business, results of operations and financial condition.

41. Any Penalty or demand raise by statutory authorities in future may result in unplanned costs to the Company.

Our Company is mainly engaged in digital market services which attracts tax liability such as Income tax & Goods and Service Tax and other applicable provision of the Acts. However, the Company has been depositing the return under above applicable acts but any demand or penalty raise by concerned authority in future for any previous year and current year will affect the financial position of the Company. For detail, please refer "Outstanding Litigations and Material Development" beginning on page 163 of this Draft Red Herring Prospectus. Any such penalty arising in future may lead to financial loss to our Company.

42. *We face foreign exchange risks that could affect our results of operations.*

We face foreign exchange rate risk as some of the financial transactions are denominated in a currency other than the Indian Rupee. Because of our foreign currency exposures, exchange rate fluctuations between the Indian Rupee and foreign currencies, especially the U.S. dollar, can have a material impact on our results of operations, cash flows and financial condition. The exchange rate between the Indian Rupee and U.S. dollar has been volatile in recent periods and may continue to remain volatile in the future.

Fluctuations in the exchange rates may affect us to the extent of the orders being placed overseas. Our Company may enter into certain contracts to hedge exchange rate fluctuations which may or may not adequately cover the potential loss that may arise as a result of such foreign exchange transactions. Moreover, these hedges may not cover all such exposures and are in any event subject to their own risks, including counterparty credit risk. Adverse moves in exchange rates that we have not adequately hedged may impact our profitability and financial condition.

For further details of our financial statements, please refer to the chapter titled “Financial Information of the Company” on page 149 of this Draft Red Herring Prospectus.

43. *The Company has not made any provision for decline or revalued in value of Investment of the Company.*

Our Company has made an investment in Shares of Cyber Media Services Pte Ltd. for a consideration of Rs. 0.66 Lakhs in 1000 Shares. We have not made any provision for this Increase or decrease in the value of investments, if provision is made in future on account of permanent decrease in value of these investments, our profits would reduce to the extent of such provision. This may have an adverse impact on our results of operations and financial conditions.

44. *Our Company will not receive any proceeds from the Offer for Sale portion, and the Selling Shareholder shall be entitled to the Offer Proceeds to the extent of the Equity Shares offered by it in the Offer for Sale.*

The Offer includes an offer for sale of such number of Equity Shares aggregating up to [●] by the Selling Shareholders, which is also the Company’s Promoter. The Selling Shareholder is, therefore, interested in the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale. The entire proceeds (net of offer expenses) from the Offer for Sale will be paid to the Selling Shareholder in proportion to their respective portions of the Offered Shares transferred pursuant to the Offer for Sale, and our Company will not receive any such proceeds.

For further details, please refer “Capital Structure” and “Objects of the Offer” beginning on pages 65 and 86, respectively of this Draft Red Herring Prospectus.

45. *We have not identified any alternate source of raising the working capital mentioned as our ‘Objects of the Offer’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

Our Company has not identified any alternate source of funding for our working capital requirement and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Offer proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may require our Company to borrow funds on unfavourable terms, both of which scenarios may affect the business operations and financial performance of the Company.

For further details of our Object for the Offer, please refer chapter titled “Object for the Offer” beginning on Page 86 of this Draft Red Herring Prospectus.

46. *The objects of the Offer for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds in the project is entirely at the discretion of our management and as per the details mentioned in the section titled —Objects of the Offer. Any revision in the estimates may require us to reschedule our project expenditure and may have a bearing on our expected revenues and earnings.*

Our funding requirements and the deployment of the proceeds of the Offer are purely based on our management’s estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time to time and consequently our funding requirements may also change. Our estimates for expansion may exceed the value that would have been determined by the management and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the objects of the Offer is entirely at the discretion of our management and is not subject to monitoring by any external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee.

47. Our Company's management will have flexibility in utilizing the Net Proceeds from the Offer. The deployment of the Net Proceeds from the Issue is not subject to any monitoring by any independent agency.

Our Company intends to primarily use the Net Proceeds towards working capital requirement, Funding investments in new projects and general corporate purposes as described in "Objects of the Offer" on page 86 of this Draft Red Herring Prospectus. In terms of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of Rs.100 crores. The management of our Company will have discretion to use the Net Proceeds from the Offer, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Offer. Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Offer will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Offer and our business and financial results may suffer.

48. We have issued Equity Shares during the last one year at a price that may be below the Issue Price. Furthermore, the average cost of acquisition of Equity Shares by our Promoter could be lower than the Offer Price.

In the last 12 months we may have issued fresh Equity Shares to the promoter and other shareholders of our Company which are as follows: -

- Bonus Issue of Equity Shares dated February 22, 2022 issuing 16,20,000 Equity shares face value Rs 10/- per Equity Share.

Furthermore, our Promoter average cost of acquisition of Equity Shares in our Company may be lower than the Offer Price as may be decided by the Company, in consultation with the BRLM.

For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapters "Capital Structure" beginning on page 65 of this Draft Red Herring Prospectus.

49. Deployment of the Proceeds is not subject to any monitoring by any independent agency. The purposes for which the Proceeds of the Issue are to be utilized are based on management estimates and have not been appraised by any banks or financial institutions.

We intend to use the Proceeds of the Issue for the purposes described in "Objects of the Offer" on page no. 86 of this Draft Red Herring Prospectus. Our management may revise estimated costs, fund requirements and deployment schedule owing to factors relating to our business and operations and external factors which may not be within the control of our management. The utilization of the Proceeds of the Issue and other financings will be monitored only by the Audit Committee of the Board and is not subject to any monitoring by any independent agency. Further, pending utilization of the Proceeds of the Issue, we intend to deposit the Net Proceeds only in scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1934.

Our funding requirements and the deployment of the Proceeds of the Issue are based on management estimates and have not been appraised by any banks or financial institutions. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change.

50. We will continue to be controlled by our Promoter and Promoter Group after the completion of the Offer, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

As on the date of this Draft Red Herring Prospectus, our Promoter and Promoter Group hold 63.16% of the issued and outstanding paid-up share capital of our Company. Following the completion of the Offer, our Promoter and Promoter Group will continue to hold together [●] % of our post- Offer Equity Share capital. As a result, they will have the ability to influence matters requiring shareholders' approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions.

For further details regarding our shareholding, please refer to chapter titled “Capital Structure” beginning on Page 65 of this Draft Red Herring Prospectus.

51. Our Equity Shares have never been publicly traded and may experience price and volume fluctuations following the completion of the Offer, an active trading market for the Equity Shares may not develop, the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Offer Price or at all.

Prior to the Offer, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for our Equity Shares will develop or, if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is determined considering various financial factors of the Company and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. There has been significant volatility in the Indian stock markets in the recent past, and the trading price of our Equity Shares after this Issue could fluctuate significantly as a result of market volatility or due to various internal or external risks, including but not limited to those described in this Draft Red Herring Prospectus. A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment.

52. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

53. The Offer Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer Price and you may not be able to sell your Equity Shares at or above the Offer Price.

The Offer Price of our Equity Shares has been determined through the Book building process. This price is based on numerous factors. For further information, see “Basis for Offer Price” beginning on page 91 of this Draft Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

54. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

55. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Offer Price.*

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Offer Price as may be decided by the Company, in consultation with the LM. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapters “Capital Structure” beginning on page 65 of this Draft Red Herring Prospectus.

56. *The requirements of being a listed company may strain our resources and distract management.*

As a listed company, we will also incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulation, 2015 which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

57. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

EXTERNAL RISK FACTORS

58. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Continued high rates of inflation may increase our expenses related to salaries or wages payable to our employees or any other expenses. There can be no assurance that we will be able to pass on any additional expenses to our payers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

59. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

60. *Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.*

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the “CCI”). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void. Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the “Combination Regulation Provisions”), which came into effect from June 1, 2011. The Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

61. *The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.*

The goods and service tax (“GST”) that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules (“GAAR”), The general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

62. *You may be restricted in your ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of your ownership position.*

Under the Companies Act, a company incorporated in India must offer its shareholders pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares who have voted on the resolution, or unless the company has obtained approval from the Government of India to issue without such special resolution, subject to votes being cast in favour of the proposal exceeding the votes cast against such proposal. However, if the law of the jurisdiction you are in does not permit you to exercise your pre-emptive rights without our Company filing an offering document or a registration statement with the applicable authority in the jurisdiction you are in, you will be unable to exercise your pre-emptive rights unless our Company makes such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interest in our Company would be reduced.

63. *Political, economic or other factors that are beyond our control may have an adverse effect on our business, results of operations and cash flows.*

We currently operate only in India and are dependent on domestic, regional and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent on the IT industry of the Indian economy. There have been periods of slowdown in the economic growth of India. For instance, the present situation of lock-down is prevailing in India due to pandemic Covid-19 spread in India and all other parts of world. If such conditions prevail for longer time the Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is also affected by various other factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

64. *Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.*

The Ministry of Corporate Affairs ("MCA"), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 ("Ind AS") which have come into effect from April 1, 2015 and are applicable to companies which fulfil certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

65. *Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.*

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;

- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector; international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

66. Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations' debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events, such as the European sovereign debt crisis, have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

67. A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavourable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. For example, there may be an increasing number of laws and regulations pertaining to the internet and e-commerce, which may relate to liability for information retrieved from or transmitted over the internet or mobile networks, user privacy, content restrictions and the quality of services sold or provided through the internet. The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well. Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company and Selling Shareholder in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

GLOBAL OUTLOOK

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies. The ongoing retrenchment of China's real estate sector and slower-than-expected recovery of private consumption also have limited growth prospects.

Global growth is expected to moderate from 5.9 in 2021 to 4.4 percent in 2022—half a percentage point lower for 2022 than in the October World Economic Outlook (WEO), largely reflecting forecast markdowns in the two largest economies. A revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages produced a downward 1.2 percentage-points revision for the United States. In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow to 3.8 percent in 2023. Although this is 0.2 percentage point higher than in the previous forecast, the upgrade largely reflects a mechanical pickup after current drags on growth dissipate in the second half of 2022. The forecast is conditional on adverse health outcomes declining to low levels in most countries by end-2022, assuming vaccination rates improve worldwide and therapies become more effective.

Elevated inflation is expected to persist for longer than envisioned in the October WEO, with ongoing supply chain disruptions and high energy prices continuing in 2022. Assuming inflation expectations stay well anchored, inflation should gradually decrease as supply-demand imbalances wane in 2022 and monetary policy in major economies responds.

Risks to the global baseline are tilted to the downside. The emergence of new COVID-19 variants could prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures mean uncertainty around inflation and policy paths is high. As advanced economies lift policy rates, risks to financial stability and emerging market and developing economies' capital flows, currencies, and fiscal positions—especially with debt levels having increased significantly in the past two years—may emerge. Other global risks may crystallize as geopolitical tensions remain high, and the ongoing climate emergency means that the probability of major natural disasters remains elevated.

With the pandemic continuing to maintain its grip, the emphasis on an effective global health strategy is more salient than ever. Worldwide access to vaccines, tests, and treatments is essential to reduce the risk of further dangerous COVID-19 variants. This requires increased production of supplies, as well as better in-country delivery systems and fairer international distribution. Monetary policy in many countries will need to continue on a tightening path to curb inflation pressures, while fiscal policy—operating with more limited space than earlier in the pandemic—will need to prioritize health and social spending while focusing support on the worst affected. In this context, international cooperation will be essential to preserve access to liquidity and expedite orderly debt restructurings where needed. Investing in climate policies remains imperative to reduce the risk of catastrophic climate change.

The Forces Shaping the Outlook

Adverse developments since the October WEO mean that the global economy is entering 2022 in a weaker position than anticipated. News of the Omicron variant led to increased mobility restrictions and financial market volatility at the end of 2021. Supply disruptions have continued to weigh on activity. Meanwhile, inflation has been higher and more broad-based than anticipated, particularly in the United States. Adding to these pressures, the retrenchment in China's real estate sector appears to be more drawn out and the recovery in private consumption is weaker than previously expected.

The pandemic's continued grip: Since the start of October, COVID-19 deaths have averaged about 7,000 a day worldwide, down from about 10,000 in late August. The diffusion of vaccines—although still uneven—has played a major role, with over 55 percent

of people having received at least one dose. Yet the emergence of the Omicron variant in late November threatens to set back this tentative path to recovery. As of mid-January, Omicron appeared to be more transmissible than Delta, but its symptoms are perhaps less severe. The net effect on hospitalizations and deaths is still unknown. The baseline forecast is conditioned on adverse health outcomes—severe illness, hospitalizations, and deaths—coming down to low levels in most countries by the end of 2022. This assumes that most countries achieve vaccination rates consistent with the IMF’s pandemic proposal¹ by end-2022, therapies become widely accessible, and the combination proves effective in protecting against Omicron and any other variants that emerge. Some emerging market and developing economies are anticipated to fall short of the vaccination target in 2022 and achieve sufficiently broad coverage only in 2023.

Downside surprises in the second half of 2021: Supply disruptions continued into the fourth quarter, hindering global manufacturing—especially in Europe and the United States. A resurgence in COVID cases (particularly in Europe) also held back a broader recovery. In China, disruptions from COVID outbreaks, interruptions to industrial production from power outages, declining real estate investment, and a faster-than-expected withdrawal of public investment all contributed to a second-half slowdown. Although there were signs of a global turnaround in November—with a pickup in international trade and upside surprises for services activity and industrial production data—this only partially offset earlier declines.

Broadening price pressures: The emergence of a new variant is not the only risk that has crystallized in recent months. Inflation continued to rise throughout the second half of 2021, driven by several factors of varying importance across regions (Figure 1). Fossil fuel prices have almost doubled in the past year, driving up energy costs and causing higher inflation, most prominently in Europe. Rising food prices have contributed to higher inflation, for example in sub-Saharan Africa. Meanwhile, ongoing supply chain disruptions, clogged ports, land-side constraints, and high demand for goods have also led to broadening price pressures, especially in the United States. Higher imported goods prices have contributed to inflation for example in Latin America and the Caribbean region.

Figure 1. Change in Inflation, December 2020 — Latest
(Percentage points)

Sources: Haver Analytics; and IMF staff calculations.

Note: "Change in inflation" refers to the difference in year-over-year growth of the consumer price index between December 2020 and the latest available data. Stacked bars show the contribution of each component to that change. FX refers to short-term depreciation-induced inflation using estimates from Carrière-Swallow and others (2021). Sample includes countries for which all components are available. This covers 26 European countries, 2 other AEs, and 15 EMDEs. Purchasing-power-parity weights are used for aggregation. AEs = advanced economies; EMDEs = emerging market and developing economies; FX = import-weighted nominal effective exchange rate depreciation.

Monetary conditions have tightened globally. In the United States, with price and wage pressures broadening, the Federal Reserve decided to accelerate its taper of asset purchases and signalled that it will raise rates further in 2022 than previously expected. The European Central Bank (ECB) has announced it will end net asset purchases under the Pandemic Emergency Purchase Programme in March 2022, while it will temporarily increase net purchases by a modest amount under its longer-standing Asset Purchase Programme. The ECB has also committed to maintaining its key interest rates at current levels until adequate progress is made toward stabilizing inflation at its medium-term target.

Global Growth Set to Moderate and Inflation to Persist Longer

Global growth is estimated at 5.9 percent in 2021 and is expected to moderate to 4.4 percent in 2022, half a percentage point lower than in the October 2021 World Economic Outlook (Table 1). The baseline incorporates anticipated effects of mobility restrictions, border closures, and health impacts from the spread of the Omicron variant. These vary by country depending on susceptibility of the population, the severity of mobility restrictions, the expected impact of infections on labour supply, and the importance of contact-intensive sectors. These impediments are expected to weigh on growth in the first quarter of 2022. The negative impact is expected to fade starting in the second quarter, assuming that the global surge in Omicron infections abates and the virus does not mutate into new variants that require further mobility restrictions. Forecasts are based on information up to 18 January 2022.

Among changes to advanced economy forecasts for 2022, a revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply chain disruptions have contributed to a downgrade of 1.2 percentage points for the United States. In Canada, weaker data outturns toward the end of 2021 and anticipated softer external demand for 2022 (related to the US revision) have led to a 0.8 percentage-point downgrade. In the euro area, prolonged supply constraints and COVID disruptions produced a less severe revision of 0.4 percentage point—led by a markdown of 0.8 percentage point for Germany largely due to the economy’s exposure to supply chain shocks. Mobility restrictions imposed toward the end of 2021 are expected to drag on growth in the euro area in early 2022. In the United Kingdom, disruptions related to Omicron and supply constraints (particularly in labour and energy markets) mean that growth is revised down by 0.3 percentage point to 4.7 percent.

The 2022 forecast downgrade also reflects revisions among a few large emerging markets. In China, disruption in the housing sector has served as a prelude to a broader slowdown. With a strict zero-COVID strategy leading to recurrent mobility restrictions and deteriorating prospects for construction sector employment, private consumption is likely to be lower than anticipated. In combination with lower investment in real estate, this means that the growth forecast for 2022 is revised down relative to October by 0.8 percentage point, at 4.8 percent, with negative implications for trading partners’ prospects. The outlook has also weakened in Brazil, where the fight against inflation has prompted a strong monetary policy response, which will weigh on domestic demand. A similar dynamic is at work in Mexico, albeit to a lesser extent. In addition, the US downgrade brings with it the prospect of weaker-than-expected external demand for Mexico in 2022. In Russia, the forecast is marginally marked down because of a weak harvest and worse-than-expected third wave. South Africa’s growth forecast is downgraded in light of a softer-than-expected second half in 2021 and a weaker outlook for investment as business sentiment remains subdued.

The upward revision to global growth in 2023 is mostly mechanical. Eventually, the shocks dragging 2022 growth will dissipate and—as a result—global output in 2023 will grow a little faster. Among prominent revisions not due to the pandemic, India’s prospects for 2023 are marked up on expected improvements to credit growth—and, subsequently, investment and consumption—building on better-than-anticipated performance of the financial sector. Japan’s 2023 growth outlook is also revised up by 0.4 percentage point, reflecting anticipated improvements in external demand and continued fiscal support. The upward revision to 2023 global growth is, however, not enough to make up ground lost due to the downgrade to 2022. Cumulative global growth over 2022 and 2023 is projected to be 0.3 percentage point lower than previously forecast.

Inflation is expected to remain elevated in the near term, averaging 3.9 percent in advanced economies and 5.9 percent in emerging market and developing economies in 2022, before subsiding in 2023. Assuming medium-term inflation expectations remain well anchored and the pandemic eases its grip, higher inflation should fade as supply chain disruptions ease, monetary policy tightens, and demand rebalances away from goods-intensive consumption towards services. The rapid increase in fuel prices is also expected to moderate during 2022–23, which will help contain headline inflation. Futures markets indicate oil prices will rise about 12 percent and natural gas prices about 58 percent in 2022 (both considerably lower than the increases seen in 2021) before retreating in 2023 as supply-demand imbalances recede further. Similarly, food prices are expected to increase at a more moderate pace of about 4½ percent in 2022 and decline in 2023. In many countries, nominal wage growth remains contained despite employment and participation returning almost to pre-pandemic levels. But in the United States the story is different: a sharp decline in unemployment has been accompanied by buoyant nominal wage growth. This suggests a degree of tightening in US labour markets not evident elsewhere. If US labour force participation remains below pre-pandemic levels and discouraged workers remain on the side-lines, tighter labour markets may feed through to higher prices. As a result, the Federal Reserve communicated in December 2021 that it will taper asset purchases at a faster pace and signalled that the federal funds rate will likely be raised to 0.75–1.00 percent by the end of 2022, some 50 basis points higher than in the previous guidance. Global trade is expected to moderate in 2022 and 2023, in line with the overall pace of the expansion. Assuming that the pandemic eases over 2022, supply chain problems are expected to abate later in the year. The accompanying moderation in global goods demand will also help reduce imbalances. Cross-border services trade—particularly tourism—is expected to remain subdued.

INDIAN ECONOMY OVERVIEW

Introduction

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market size

India's gross domestic product (GDP) at current prices stood at Rs. 51.23 lakh crore (US\$ 694.93 billion) in the first quarter of FY22, as per the provisional estimates of gross domestic product for the first quarter of 2021-22.

India is the fourth-largest unicorn base in the world with over 21 unicorns collectively valued at US\$ 73.2 billion, as per the Hurun Global Unicorn List. By 2025, India is expected to have ~100 unicorns by 2025 and will create ~1.1 million direct jobs according to the Nasscom-Zinnov report 'Indian Tech Start-up'.

India needs to increase its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030's, for productivity and economic growth according to McKinsey Global Institute. Net employment rate needs to grow by 1.5% per year from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030.

According to data from the Department of Economic Affairs, as of August 27, 2021, foreign exchange reserves in India reached US\$ 633.5 billion mark.

Recent Developments

With an improvement in the economic scenario, there have been investments across various sectors of the economy. The private equity - venture capital (PE-VC) sector recorded investments worth US\$ 10.7 billion across 137 deals in August 2021, registering a 5x YoY growth. Some of the important recent developments in Indian economy are as follows:

- India's merchandise exports between April 2021 and August 2021 were estimated at US\$ 164.10 billion (a 67.33% YoY increase). Merchandise imports between April 2021 and August 2021 were estimated at US\$ 219.63 billion (an 80.89% YoY growth).
- In August 2021, the Manufacturing Purchasing Managers' Index (PMI) in India stood at 52.3.
- The gross GST (Goods and Services Tax) revenue collection stood at Rs. 112,020 crore (US\$ 15.21 billion) in August 2021.

- India's Index of Industrial Production (IIP) for July 2021 stood at 131.4 against 122.6 for June 2021.
- Consumer Food Price Index (CFPI) – Combined inflation was 3.11 in August 2021 against 3.96 in July 2021.
- Consumer Price Index (CPI) – Combined inflation was 5.30 in August 2021 against 5.59 in July 2021.
- Foreign portfolio investors (FPIs) invested US\$ 2.5 billion in India in August 2021.

Government Initiatives

The first Union Budget of the third decade of 21st century was presented by Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman in the Parliament on February 1, 2020. The budget aimed at energising the Indian economy through a combination of short-term, medium-term and long-term measures.

In the Union Budget 2021-22, capital expenditure for FY22 is likely to increase to increase by 34.5% at Rs. 5.5 lakh crore (US\$ 75.81 billion) over FY21 (BE) to boost the economy.

Increased government expenditure is expected to attract private investments, with production-linked incentive scheme providing excellent opportunities. Consistently proactive, graded and measured policy support is anticipated to boost the Indian economy.

In September 2021, Prime Minister Mr. Narendra Modi approved the production-linked incentive (PLI) scheme in the textiles sector—for man-made fibre (MMF) apparel, MMF fabrics and 10 segments/products of technical textiles—at an estimated outlay of Rs. 10,683 crore (US\$ 1.45 billion).

In September 2021, the government approved a production-linked incentive (PLI) scheme for automobile and drone industries with an outlay of Rs. 26,058 crore (US\$ 3.54 billion) to boost the country's manufacturing capabilities.

In September 2021, Union Cabinet approved major reforms in the telecom sector, which is expected to boost employment, growth, competition and consumer interests. Key reforms include rationalisation of adjusted gross revenue, rationalisation of bank guarantees (BGs) and encouragement to spectrum sharing.

In September 2021, the government announced plans to release Rs. 56,027 crore (US\$ 7.62 billion) under various export promotion schemes to boost exports.

In August 2021, the Indian government approved Deep Ocean Mission (DOM) with a budget outlay of Rs. 4,077 crore (US\$ 553.82 million) over the next five years.

In May 2021, the government approved the production linked incentive (PLI) scheme for manufacturing advanced chemistry cell (ACC) batteries at an estimated outlay of Rs. 18,100 crore (US\$ 2.44 billion); this move is expected to attract domestic and foreign investments worth Rs. 45,000 crore (US\$ 6.07 billion).

The Union Cabinet approved the production linked incentive (PLI) scheme for white goods (air conditioners and LED lights) with a budgetary outlay of Rs. 6,238 crore (US\$ 848.96 million) and the 'National Programme on High Efficiency Solar PV (Photo Voltaic) Modules' with an outlay of Rs. 4,500 crore US\$ 612.43 million).

In June 2021, the RBI (Reserve Bank of India) announced that the investment limit for FPI (foreign portfolio investors) in the State Development Loans (SDLs) and government securities (G-secs) would persist unaffected at 2% and 6%, respectively, in FY22.

To boost the overall audit quality, transparency and add value to businesses, in April 2021, the RBI issued a notice on new norms to appoint statutory and central auditors for commercial banks, large urban co-operatives and large non-banks and housing finance firms.

In May 2021, the Government of India has allocated Rs. 2,250 crore (US\$ 306.80 million) for development of the horticulture sector in 2021-22.

In November 2020, the Government of India announced Rs. 2.65 lakh crore (US\$ 36 billion) stimulus package to generate job opportunities and provide liquidity support to various sectors such as tourism, aviation, construction and housing. Also, India's cabinet approved the production-linked incentives (PLI) scheme to provide ~Rs. 2 trillion (US\$ 27 billion) over five years to create jobs and boost production in the country.

Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, launched Make in India initiative with an aim to boost country's manufacturing sector and increase purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. SIGNIFICANT ACCOUNTING POLICIES

obligation, or at the amounts of cash or cash equivalents expected to be paid to satisfy the liability in the normal course of business.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. Fair value for measurement and/or disclosure purpose in these financial statements is determined on such basis except for, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value.

In addition, for financial reporting purposes fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs for the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

- Level 1 -Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 -Inputs are inputs, other than quoted prices included within level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3- inputs are unobservable inputs for the asset or liability.

2.3 Use of Estimates

The preparation of restated consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting period. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates. Difference between the actual results and estimates are recognized in the period in which the results are known/materialised.

2.4 Revenue recognition

Revenue of all material items and nature are recognized at the time of rendering of sales or Services. If at the time of rendering of services or sales there is significant uncertainty in Ultimate collection of the revenue, then the revenue recognition is postponed and in such Cases revenue is recognized only when it becomes reasonably certain that ultimate collection will be made. When the uncertainty of collection of revenue arises subsequently after the revenue recognition, provision for the uncertainty in the collection is made rather than adjustment in revenue already recognized. Dividend income is recognized when right to receive is established. Interest Income is recognized on time proportion basis taking in to account the amount outstanding and rate applicable.

2.5 Property, Plant and Equipment (PPE)

Property, plant and equipment (PPE) are carried at cost less accumulated depreciation and impairment losses, if any.

The cost of Property, plant and equipment (PPE) comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses, present value of decommissioning costs (where there is a legal or constructive obligation to decommission) and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use.

Property, plant and equipment are tested for impairment whenever events or changes in circumstances indicate that an asset may be impaired. If an impairment loss is determined, the remaining useful life of the asset is also subject to adjustment. If the reasons for previously recognised impairment losses no longer exist, such impairment losses are reversed and recognised in income. Such reversal shall not cause the carrying amount to exceed the amount that would have resulted had no impairment taken place during the preceding periods.

SIGNIFICANT ACCOUNTING POLICIES

Depreciation

Depreciation is recognised for Property, Plant and Equipment (PPE) so as to write-off the cost less residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis taking into account commercial and technological obsolescence as well as normal wear and tear.

Depreciation on tangible assets is provided on straight line method, except for vehicles which are depreciated on written down value method, over the useful lives of the assets estimated by Management. Depreciation on assets acquired is provided for the full month, irrespective of the date on which the assets were put to use and depreciation is not provided in the month of sale/discard of an asset. Depreciation for assets purchased/sold during a period is proportionately charged. Individual low cost assets (acquired for less than Rs.5000) are entirely depreciated in the year of acquisition.

2.6 Inventory

Inventory of newsprint, goods in transit are stated at cost or net realisable value, whichever is lower. Cost comprises all cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost formulae used are 'First in First Out', 'Average cost', or 'Specific Identification', as applicable. Due allowance is estimated and made for defective and obsolete items, wherever necessary, based on the past experience of the Company / Group.

2.7 Taxation

Income tax expense represents the sum of tax currently payable and deferred tax.

2.7.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. Current tax is determined on the basis of taxable income and tax credits computed for Company / Group, in accordance with the applicable tax rates and the provisions of applicable tax laws applicable to Company / Group in the respective jurisdiction in which it operates. Advance taxes and provisions for current income taxes are presented in the Balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction and where the relevant taxpaying units intends to settle the asset and liability on a net basis.

2.7.2 Deferred Tax

Deferred tax assets and liabilities are measured using the enacted/substantively enacted tax rates and laws for continuing operations. Deferred tax assets are recognized for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses. The carrying amount of deferred tax assets is reviewed at each balance sheet date to reassess realisation.

Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.8 Employee Benefits

Defined contribution plan

A defined contribution plan is a plan under which the Company / Group pays fixed contributions into an independent fund administered by the government/Company / Group administrated Trust. The Company / Group have no legal or constructive obligations to pay further contributions after its payment of the fixed contribution.

SIGNIFICANT ACCOUNTING POLICIES

Defined benefit plan

The defined benefit plans sponsored by the Company / Group define the amount of the benefit that an employee will receive on completion of services by reference to length of service and last drawn salary. Gratuity is in the nature of a defined benefit plan. The liability recognised in the financial statements in respect of the plan is the present value of the defined benefit obligation net of fair value of plan assets at the reporting date, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is calculated at the reporting date by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are credited or charged to the statement of Other Comprehensive Income in the period in which such gains or losses are determined.

Other long-term employee benefits

Liability in respect of compensated absences becoming due or expected to be availed more than one-year after the balance sheet date is estimated on the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are charged to statement of profit and loss in the period in which such gains or losses are determined.

Short-term employee benefits

Expense in respect of other short term benefits is recognised on the basis of the amount paid or payable for the period during which services are rendered by the employee.

2.9 Provision, Contingent Liabilities

Provisions are recognised when the Company / Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company / Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). Contingent Liability is disclosed after careful evaluation of facts, uncertainties and possibility of reimbursement; unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent liabilities are not recognized but are disclosed in notes.

2.10 Financial instruments

Financial assets and liabilities are recognised when the Company / Group becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss (FVTPL) are recognised immediately in the statement of profit and loss.

Financial assets

All recognised financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

Cash and cash equivalents

The Company / Group considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

SIGNIFICANT ACCOUNTING POLICIES

Financial assets at amortized cost

Financial assets are subsequently measured at amortised cost using the effective interest method if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income (OCI) if these financial assets are held within a business whose objective is achieved by both selling financial assets and collecting contractual cash flows, the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. On initial recognition, the Company / Group makes an irrevocable election on an instrument-by-instrument basis to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments, other than equity investment which are held for trading. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the "Reserve for equity instruments through other comprehensive income". The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments. So far, the Company / Group has not elected to present subsequent changes in fair value of any investment in OCI.

Financial assets at fair value through profit or loss ('FVTPL')

Investment in equity instruments are classified as at FVTPL, unless the Company / Group irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investment in equity instruments which are not held for trading. Other financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

Impairment of financial assets (other than at fair value)

The Company / Group measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company / Group measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. However, for trade receivables, the Company / Group measures the loss allowance at an amount equal to lifetime expected credit losses. In cases where the amounts are expected to be realised up to one year from the date of the invoice, loss for the time value of money is not recognised, since the same is not considered to be material.

Derecognition of financial assets

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in profit or loss if such gain or loss.

2.11 Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by a Company / Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its liabilities. Equity instruments issued by the Company / Group are recognised at the proceeds received, net of direct issue costs.

Compound financial instruments

SIGNIFICANT ACCOUNTING POLICIES

The components of compound instruments are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by issue of fixed number of the Company / Group's own equity instruments in exchange of a fixed amount of cash or another financial asset is an equity instrument. At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recognised as a liability on an amortized cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to other component of equity. When the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to retained earnings. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option. Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible notes using the effective interest method.

Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method.

Derecognition of financial liabilities

The Company / Group derecognise financial liabilities when, and only when, the Company / Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

2.12 Trade and other Payables

These amounts represent liabilities for goods & services provided to the Company / Group prior to the end of the financial year which are unpaid. These are recognised initially at fair value and subsequently measured at amortised cost using effective interest method.

2.13 Segment reporting

The Company / Group is mainly engaged in Media Business which is identified as the only reportable business segment of the Company / Group in accordance with the requirements of Ind AS 108 , 'Operating Segment Reporting', notified under the Companies (Indian Accounting Standards) Rules, 2015. All the operating facilities are located in India. The Company / Group's business activity primarily falls within a single geographical segment.

2.14 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company / Group are segregated based on the available information.

2.15 Earnings per share

SIGNIFICANT ACCOUNTING POLICIES

Basic earning per share is computed by dividing the profit/loss for the year attributable to the shareholders of the parent Company / Group by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit/loss for the year attributable to the shareholders of the parent as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

2.16 Operating Cycle

Based on the nature of products/activities of the Company / Group and the normal time between acquisition of assets and their realization in cash or cash equivalents, the Company / Group has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

2.17 Leases

Till 31st March 2019, the Company / Group had adopted Ind AS 17, Leases. In March 2019, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) Amendment Rules, 2019 notifying Ind AS 116, Leases and withdrawing Ind AS 17, Leases. Ind AS 116 is effective from accounting periods beginning from 1st April 2019.

Ind AS 116 introduces a single, on-balance sheet lease accounting model for lessees. A lessee recognizes a right of use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are recognition exemptions for short-term leases and leases of low-value items. Lessor accounting remains similar to the erstwhile standard – i.e. lessors continue to classify leases as finance or operating leases. The Company / Group has applied the transition provisions as mentioned in Appendix C to Ind AS 116. There is no financial impact on the Company / Group on adoption of Ind AS 116.

At inception of a contract, the Company / Group assesses whether the contract is, or contains a lease. A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration

Company / Group as a lessor

The Company / Group classify each of its leases as either an operating lease or a finance lease.

Leases in which the Company / Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. The depreciation policy for depreciable underlying assets subject to operating leases is consistent with the Company / Group's normal depreciation policy for similar assets. Contingent rents are recognised as revenue in the period in which they are earned.

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company / Group to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company / Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

Company / Group as a lessee

SIGNIFICANT ACCOUNTING POLICIES

At the contract commencement date, the Company / Group recognize right – of – use asset and a lease liability. A right – of – use asset is an asset that represents a lessee's right to use an underlying asset for the lease term. The Company / Group has elected not to apply the aforesaid requirements to short term leases (leases which at the commencement date has a lease term of 12 months or less) and leases for which the underlying asset is of low value as described in paragraphs B3 – B9 of Ind AS 116.

A right of use asset is initially measured at cost and subsequently applies the cost mode ie less any accumulated depreciation and any accumulated impairment losses and adjusted for any remeasurement of lease liability. Ind AS 16, Property, Plant and Equipment is applied in depreciating the right – of – use asset.

A lease liability is initially measured at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, the Company / Group's incremental borrowing rate is used. Subsequently, the carrying amount of the lease liability is increased to reflect interest on lease liability; reduced to reflect the lease payments; and remeasured to reflect any reassessment or lease modifications or to reflect revised in – substance fixed lease payments.

2.19 Critical accounting judgements and key sources of estimation uncertainty

2.19.1 Critical accounting judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations that the Management have made in the process of applying the Company / Group's accounting policies and that have most significant effect on the amounts recognised in the consolidated financial statements.

Defined benefit plans (gratuity benefits)

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

2.20 Key Source of estimation uncertainty

Key source of estimation uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of impairment of investments, provisions and contingent liabilities.

SIGNIFICANT ACCOUNTING POLICIES

The areas involving critical estimates are:

Useful lives and residual values of property, plant and equipment

Useful life and residual value of property, plant and equipment are based on management's estimate of the expected life and residual value of those assets. These estimates are reviewed at the end of each reporting period. Any reassessment of these may result in change in depreciation expense for future years (Refer note no 3.5).

Impairment of Property Plant and Equipment

The recoverable amount of the assets has been determined on the basis of their value in use. For estimating the value in use it is necessary to project the future cash flow of assets over its estimated useful life. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for in statement of profit or loss.

Valuation of Deferred tax assets

Deferred tax assets are recognised only to the extent it is considered probable that those assets will be recoverable. This involves an assessment of when those deferred tax assets are likely to reverse and a judgment as to whether or not there will be sufficient taxable profits available to offset the tax assets when they do reverse. The Company / Group review the carrying amount of deferred tax assets at the end of each reporting period. Any change in the estimates of future taxable income may impact the recoverability of deferred tax assets.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or liability, the Company takes into account the characteristics of the asset or a liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purpose in these financial statements is determined on such basis except for, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs for the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

- a) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

SIGNIFICANT ACCOUNTING POLICIES

b) Level 2 inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.

c) Level 3 inputs are unobservable inputs for the asset or liability.

2.3 Use of Estimates

The preparation of financial statements requires management to make judgments, estimates and assumptions that may impact the application of accounting policies and the reported value of assets, liabilities, income, expenses and related disclosures concerning the items involved as well as contingent assets and liabilities at the balance sheet date. The estimates and management's judgments are based on previous experience & other factors considered reasonable and prudent in the circumstances. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

In order to enhance understanding of the financial statements, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is as under:

1. Formulation of accounting policies

The accounting policies are formulated in a manner that results in financial statements containing relevant and reliable information about the transactions, other events and conditions to which they apply. Those policies need not be applied when the effect of applying them is immaterial.

2. Post-employment benefit plans

Employee benefit obligations are measured on the basis of actuarial assumptions which include mortality and withdrawal rates as well as assumptions concerning future developments in discount rates, the rate of salary increases and the inflation rate. The Company considers that the assumptions used to measure its obligations are appropriate and documented. However, any changes in these assumptions may have a material impact on the resulting calculations.

3. Provisions and contingencies

The assessments undertaken in recognizing provisions and contingencies have been made in accordance with Ind AS 37 'Provisions, contingent liabilities and contingent assets'. The evaluation of the likelihood of the contingent events has required best judgment by management regarding the probability of exposure to potential loss. Should circumstances change following unforeseeable developments, this likelihood could alter.

d) Income taxes

Significant estimates are involved in determining the provision for income taxes, including amount expected to be paid/ recovered for uncertain tax positions.

2.4 Revenue recognition

Revenue of all material items and nature are recognized at the time of rendering of sales or Services. If at the time of rendering of services or sales there is significant uncertainty in Ultimate collection of the revenue, then the revenue recognition is postponed and in such Cases revenue is recognized only when it becomes reasonably certain that ultimate collection will be made. When the uncertainty of collection of revenue arises subsequently after the revenue recognition, provision for the uncertainty in the collection is made rather than adjustment in revenue already recognized. Dividend income is recognized when right to receive is established. Interest Income is recognized on time proportion basis taking in to account the amount outstanding and rate applicable.

2.5 Property, Plant and Equipment (PPE)

Property, plant and equipment (PPE) are carried at cost less accumulated depreciation and impairment losses, if any.

The cost of Property, plant and equipment (PPE) comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities),

SIGNIFICANT ACCOUNTING POLICIES

any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses, present value of decommissioning costs (where there is a legal or constructive obligation to decommission) and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use. Property, plant and equipment are tested for impairment whenever events or changes in circumstances indicate that an asset may be impaired. If an impairment loss is determined, the remaining useful life of the asset is also subject to adjustment. If the reasons for previously recognised impairment losses no longer exist, such impairment losses are reversed and recognised in income. Such reversal shall not cause the carrying amount to exceed the amount that would have resulted had no impairment taken place during the preceding periods.

Depreciation

Depreciation is recognised for Property, Plant and Equipment (PPE) so as to write-off the cost less residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis taking into account commercial and technological obsolescence as well as normal wear and tear.

Depreciation on tangible assets is provided on straight line method, except for vehicles which are depreciated on written down value method, over the useful lives of the assets estimated by Management. Depreciation on assets acquired is provided for the full month, irrespective of the date on which the assets were put to use and depreciation is not provided in the month of sale/discard of an asset.

Depreciation for assets purchased/sold during a period is proportionately charged. Individual low cost assets (acquired for less than Rs.5000) are entirely depreciated in the year of acquisition.

2.6 Inventory

Inventory of newsprint, goods in transit are stated at cost or net realisable value, whichever is lower. Cost comprises all cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost formulae used are 'First in First Out', 'Average cost', or 'Specific Identification', as applicable. Due allowance is estimated and made for defective and obsolete items, wherever necessary, based on the past experience of the Company.

2.7 Taxation

Income tax expense represents the sum of tax currently payable and deferred tax.

2.7.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible.

Current tax is determined on the basis of taxable income and tax credits computed for Company, in accordance with the applicable tax rates and the provisions of applicable tax laws applicable to Company in the respective jurisdiction in which it operates.

Advance taxes and provisions for current income taxes are presented in the Balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction and where the relevant taxpaying units intends to settle the asset and liability on a net basis.

2.7.2 Deferred Tax

Deferred tax assets and liabilities are measured using the enacted/substantively enacted tax rates and laws for continuing operations. Deferred tax assets are recognized for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses. The carrying amount of deferred tax assets is reviewed at each balance sheet date to reassess realisation.

Current and deferred tax for the year

SIGNIFICANT ACCOUNTING POLICIES

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.8 Employee Benefits

Defined contribution plan

A defined contribution plan is a plan under which the Company pays fixed contributions into an independent fund administered by the government/Company administrated Trust. The Company has no legal or constructive obligations to pay further contributions after its payment of the fixed contribution.

Defined benefit plan

The defined benefit plans sponsored by the Company define the amount of the benefit that an employee will receive on completion of services by reference to length of service and last drawn salary. Gratuity is in the nature of a defined benefit plan. The liability recognised in the financial statements in respect of the plan is the present value of the defined benefit obligation net of fair value of plan assets at the reporting date, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is calculated at the reporting date by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are credited or charged to the statement of Other Comprehensive Income in the period in which such gains or losses are determined.

Other long-term employee benefits

Liability in respect of compensated absences becoming due or expected to be availed more than one-year after the balance sheet date is estimated on the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are charged to statement of profit and loss in the period in which such gains or losses are determined.

Short-term employee benefits

Expense in respect of other short term benefits is recognised on the basis of the amount paid or payable for the period during which services are rendered by the employee.

2.9 Provision, Contingent Liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). Contingent Liability is disclosed after careful evaluation of facts, uncertainties and possibility of reimbursement, unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent liabilities are not recognized but are disclosed in notes.

2.10 Financial instruments

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss (FVTPL) are recognised immediately in the statement of profit and loss.

Financial assets

All recognised financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

SIGNIFICANT ACCOUNTING POLICIES

Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

Financial assets at amortized cost

Financial assets are subsequently measured at amortised cost using the effective interest method if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income (OCI) if these financial assets are held within a business whose objective is achieved by both selling financial assets and collecting contractual cash flows, the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. On initial recognition, the Company makes an irrevocable election on an instrument-by-instrument basis to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments, other than equity investment which are held for trading. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the "Reserve for equity instruments through other comprehensive income". The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments. So far, the Company has not elected to present subsequent changes in fair value of any investment in OCI.

Financial assets at fair value through profit or loss ('FVTPL')

Investment in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investment in equity instruments which are not held for trading. Other financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

Impairment of financial assets (other than at fair value)

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. However, for trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. In cases where the amounts are expected to be realised up to one year from the date of the invoice, loss for the time value of money is not recognised, since the same is not considered to be material.

Derecognition of financial assets

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in profit or loss if such gain or loss.

2.11 Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity Instruments

SIGNIFICANT ACCOUNTING POLICIES

An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Compound financial instruments

The components of compound instruments are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by issue of fixed number of the Company's own equity instruments in exchange of a fixed amount of cash or another financial asset is an equity instrument. At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recognised as a liability on an amortized cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to other component of equity. When the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to retained earnings. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible notes using the effective interest method.

Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method.

Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

2.12 Trade and other Payables

These amounts represent liabilities for goods & services provided to the Company prior to the end of the financial year which are unpaid. These are recognised initially at fair value and subsequently measured at amortised cost using effective interest method.

2.13 Segment reporting

The Company is mainly engaged in Media Business which is identified as the only reportable business segment of the Company in accordance with the requirements of Ind AS 108, 'Operating Segment Reporting', notified under the Companies (Indian Accounting Standards) Rules, 2015. All the operating facilities are located in India. The Company's business activity primarily falls within a single geographical segment.

2.14 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2.15 Earnings per share

Basic earnings per share are computed by dividing the profit/loss for the year attributable to the shareholders of the parent Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit/loss for the year attributable to the shareholders of the

SIGNIFICANT ACCOUNTING POLICIES

parent as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

2.16 Operating Cycle

Based on the nature of products/activities of the Company and the normal time between acquisition of assets and their realization in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

2.17 Leases

Till 31st March 2019, the Company had adopted Ind AS 17, Leases. In March 2019, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) Amendment Rules, 2019 notifying Ind AS 116, Leases and withdrawing Ind AS 17, Leases. Ind AS 116 is effective from accounting periods beginning from 1st April 2019.

Ind AS 116 introduces a single, on-balance sheet lease accounting model for lessees. A lessee recognizes a right of use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are recognition exemptions for short-term leases and leases of low-value items. Lessor accounting remains similar to the erstwhile standard – i.e. lessors continue to classify leases as finance or operating leases. The Company has applied the transition provisions as mentioned in Appendix C to Ind AS 116. There is no financial impact on the Company on adoption of Ind AS 116.

At inception of a contract, the Company assesses whether the contract is, or contains a lease. A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration

Company as a lessor

The Company classifies each of its leases as either an operating lease or a finance lease.

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. The depreciation policy for depreciable underlying assets subject to operating leases is consistent with the Company's normal depreciation policy for similar assets.

Contingent rents are recognised as revenue in the period in which they are earned.

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

Company as a lessee

At the contract commencement date, the Company recognizes right – of – use asset and a lease liability. A right – of – use asset is an asset that represents a lessee's right to use an underlying asset for the lease term. The Company has elected not to apply the aforesaid requirements to short term leases (leases which at the commencement date has a lease term of 12 months or less) and leases for which the underlying asset is of low value as described in paragraphs B3 – B9 of Ind AS 116.

SIGNIFICANT ACCOUNTING POLICIES

A right of use asset is initially measured at cost and subsequently applies the cost mode ie less any accumulated depreciation and any accumulated impairment losses and adjusted for any remeasurement of lease liability. Ind AS 16, Property, Plant and Equipment is applied in depreciating the right – of – use asset.

A lease liability is initially measured at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, the Company's incremental borrowing rate is used. Subsequently, the carrying amount of the lease liability is increased to reflect interest on lease liability; reduced to reflect the lease payments; and remeasured to reflect any reassessment or lease modifications or to reflect revised in – substance fixed lease payments.

2.18 Critical accounting judgements and key sources of estimation uncertainty

2.18.1 Critical accounting judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations that the Management have made in the process of applying the Company's accounting policies and that have most significant effect on the amounts recognised in the financial statements.

Defined benefit plans (gratuity benefits)

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

2.19 Key Source of estimation uncertainty

Key source of estimation uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of impairment of investments, provisions and contingent liabilities.

The areas involving critical estimates are:

Useful lives and residual values of property, plant and equipment

Useful life and residual value of property, plant and equipment are based on management's estimate of the expected life and residual value of those assets. These estimates are reviewed at the end of each reporting period. Any reassessment of these may result in change in depreciation expense for future years (Refer note no 3.5).

Impairment of Property Plant and Equipment

The recoverable amount of the assets has been determined on the basis of their value in use. For estimating the value in use it is necessary to project the future cash flow of assets over its estimated useful life. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for in statement of profit or loss.

Valuation of Deferred tax assets

Deferred tax assets are recognised only to the extent it is considered probable that those assets will be recoverable. This involves an assessment of when those deferred tax assets are likely to reverse and a judgment as to whether or not there will be sufficient taxable profits available to offset the tax assets when they do reverse. The Company reviews the carrying amount of deferred tax assets at the end of each reporting period. Any change in the estimates of future taxable income may impact the recoverability of deferred tax assets.

SIGNIFICANT ACCOUNTING POLICIES

2.20 Foreign Currency Transaction

Functional and presentation currency

Items included in the financial statements of entity are measured using currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is entity's functional and presentation currency.

Transactions and Balances

Transactions in foreign currencies are initially recorded at their respective functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item.

2.21 Dividend

Dividends and interim dividends payable to the Company's shareholders are recognized as changes in equity in the period in which they are approved by the shareholders' meeting and the Board of Directors respectively.

2.22 Material Prior Period Error

Material prior period errors are corrected retrospectively by restating the comparative amounts for the prior periods presented in which the error occurred. If the error occurred before the earliest period presented, the opening balances of assets, liabilities and equity for the earliest period presented, are restated.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. (2) To every such separate meeting, the provisions of these Articles relating to general meetings shall *mutatis mutandis* apply.
12. The rights conferred upon the holders of the shares of any class issued with preferred or other rights shall not, unless otherwise expressly provided by the terms of issue of the shares of that class, be deemed to be varied by the creation or issue of further shares ranking *pari passu* therewith.
13. (a) on every share (not being a fully paid share), for all monies (whether presently payable or not) called, or payable at a fixed time, in respect of that share; and

(b) on all shares (not being fully paid shares) standing registered in the name of a member, for all monies presently payable by him or his estate to the Company:

Provided that the Board may at any time declare any share to be wholly or in part exempt from the provisions of this clause.

(2) The Company's lien, if any, on a share shall extend to all dividends or interest, as the case may be, payable and bonuses declared from time to time in respect of such shares for any money owing to the Company.

(3) Unless otherwise agreed by the Board, the registration of a transfer of shares shall operate as a waiver of the Company's lien.

16. The Company may sell, in such manner as the Board thinks fit, any shares on which the Company has a lien: Provided that no sale shall be made—

(a) unless a sum in respect of which the lien exists is presently payable; or

(b) until the expiration of fourteen days after a notice in writing stating and demanding payment of such part of the amount in respect of which the lien exists as is presently payable, has been given to the registered holder for the time being of the share or to the person entitled thereto by reason of his death or insolvency or otherwise.

17. (1) To give effect to any such sale, the Board may authorise some person to transfer the shares sold to the purchaser thereof.

(2) The purchaser shall be registered as the holder of the shares comprised in any such transfer.

(3) The receipt of the Company for the consideration (if any) given for the share on the sale thereof shall (subject, if necessary, to execution of an instrument of transfer or a transfer by relevant system, as the case may be) constitute a good title to the share and the purchaser shall be registered as the holder of the share.

(4) The purchaser shall not be bound to see to the application of the purchase money, nor shall his title to the shares be affected by any irregularity or invalidity in the proceedings with reference to the sale.

18. (1) The proceeds of the sale shall be received by the Company and applied in payment of such part of the amount in respect of which the lien exists as is presently payable.

(2) The residue, if any, shall, subject to a like lien for sums not presently payable as existed upon the shares before the sale, be paid to the person entitled to the shares at the date of the sale.

19. In exercising its lien, the Company shall be entitled to treat the registered holder of any share as the absolute owner thereof and accordingly shall not (except as ordered by a court of competent jurisdiction or unless required by any statute) be bound to recognize any equitable or other claim to, or interest in, such share on the part of any other person, whether a creditor of the registered holder or otherwise. The Company's lien shall prevail notwithstanding that it has received notice of any such claim.

20. The provisions of these Articles relating to lien shall *mutatis mutandis* apply to any other securities including debentures of the Company.

Calls on shares

21. (1) The Board may, from time to time, make calls upon the members in respect of any monies unpaid on their shares (whether on account of the nominal value of the shares or by way of premium) and not by the conditions of allotment

thereof made payable at fixed times.

(2) Each member shall, subject to receiving at least fourteen days' notice specifying the time or times and place of payment, pay to the Company, at the time or times and place so specified, the amount called on his shares.

(3) The Board may, from time to time, at its discretion, extend the time fixed for the payment of any call in respect of one or more members as the Board may deem appropriate in any circumstances.

(4) A call may be revoked or postponed at the discretion of the Board.

22. A call shall be deemed to have been made at the time when the resolution of the Board authorising the call was passed and may be required to be paid by instalments.

23. The joint holders of a share shall be jointly and severally liable to pay all calls in respect thereof.

24. (1) If a sum called in respect of a share is not paid before or on the day appointed for payment thereof (the "due date"), the person from whom the sum is due shall pay interest thereon from the due date to the time of actual payment at such rate as may be fixed by the Board.

(2) The Board shall be at liberty to waive payment of any such interest wholly or in part.

25. (1) Any sum which by the terms of issue of a share becomes payable on allotment or at any fixed date, whether on account of the nominal value of the share or by way of premium, shall, for the purposes of these Articles, be deemed to be a call duly made and payable on the date on which by the terms of issue such sum becomes payable.

(2) In case of non-payment of such sum, all the relevant provisions of these Articles as to payment of interest and expenses, forfeiture or otherwise shall apply as if such sum had become payable by virtue of a call duly made and notified.

26. The Board –

(a) may, if it thinks fit, receive from any member willing to advance the same, all or any part of the monies uncalled and unpaid upon any shares held by him; and

(b) upon all or any of the monies so advanced, may (until the same would, but for such advance, become presently payable) pay interest at such rate as may be fixed by the Board.

Nothing contained in this clause shall confer on the member (a) any right to participate in profits or dividends or (b) any voting rights in respect of the moneys so paid by him until the same would, but for such payment, become presently payable by him.

27. If by the conditions of allotment of any shares, the whole or part of the amount of issue price thereof shall be payable by instalments, then every such instalment shall, when due, be paid to the Company by the person who, for the time being and from time to time, is or shall be the registered holder of the share or the legal representative of a deceased registered holder.

28. All calls shall be made on a uniform basis on all shares falling under the same class.

Explanation: Shares of the same nominal value on which different amounts have been paid-up shall not be deemed to fall under the same class.

29. Neither a judgment nor a decree in favour of the Company for calls or other moneys due in respect of any shares nor any part payment or satisfaction thereof nor the receipt by the Company of a portion of any money which shall from time to time be due from any member in respect of any shares either by way of principal or interest nor any indulgence granted by the Company in respect of payment of any such money shall preclude the forfeiture of such shares as herein provided.

30. The provisions of these Articles relating to calls shall *mutatis mutandis* apply to any other securities including debentures of the Company.

Transfer of shares

31. (1) The instrument of transfer of any share in the Company shall be duly executed by or on behalf of both the transferor and transferee.

(2) The transferor shall be deemed to remain a holder of the share until the name of the transferee is entered in the register of members in respect thereof.

32. The Board may, subject to the right of appeal conferred by the Act decline to register –

- (a) the transfer of a share, not being a fully paid share, to a person of whom they do not approve; or
- (b) any transfer of shares on which the Company has a lien.

- (a) the instrument of transfer is duly executed and is in the form as prescribed in the Rules made under the Act;
- (b) the instrument of transfer is accompanied by the certificate of the shares to which it relates, and such other evidence as the Board may reasonably require to show the right of the transferor to make the transfer; and
- (c) the instrument of transfer is in respect of only one class of shares.

34. On giving of previous notice of at least seven days or such lesser period in accordance with the Act and Rules made thereunder, the registration of transfers may be suspended at such times and for such periods as the Board may from time to time determine:

Provided that such registration shall not be suspended for more than thirty days at any one time or for more than forty-five days in the aggregate in any year.

35. The provisions of these Articles relating to transfer of shares shall *mutatis mutandis* apply to any other securities including debentures of the Company.

Transmission of shares

36. (1) On the death of a member, the survivor or survivors where the member was a joint holder, and his nominee or nominees or legal representatives where he was a sole holder, shall be the only persons recognised by the Company as having any title to his interest in the shares.

(2) Nothing in clause (1) shall release the estate of a deceased joint holder from any liability in respect of any share which had been jointly held by him with other persons.

37. (1) Any person becoming entitled to a share in consequence of the death or insolvency of a member may, upon such evidence being produced as may from time to time properly be required by the Board and subject as hereinafter provided, elect, either –

- (a) to be registered himself as holder of the share; or
- (b) to make such transfer of the share as the deceased or insolvent member could have made.

(2) The Board shall, in either case, have the same right to decline or suspend registration as it would have had, if the deceased or insolvent member had transferred the share before his death or insolvency.

(3) The Company shall be fully indemnified by such person from all liability, if any, by actions taken by the Board to give effect to such registration or transfer.

38. (1) If the person so becoming entitled shall elect to be registered as holder of the share himself, he shall deliver or send to the Company a notice in writing signed by him stating that he so elects.

(2) If the person aforesaid shall elect to transfer the share, he shall testify his election by executing a transfer of the share.

(3) All the limitations, restrictions and provisions of these regulations relating to the right to transfer and the registration of transfers of shares shall be applicable to any such notice or transfer as aforesaid as if the death or insolvency of the member had not occurred and the notice or transfer were a transfer signed by that member.

39. A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same

dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the Company:

Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the share, until the requirements of the notice have been complied with.

40. The provisions of these Articles relating to transmission by operation of law shall *mutatis mutandis* apply to any other securities including debentures of the Company.

Forfeiture of shares

41. If a member fails to pay any call, or instalment of a call or any money due in respect of any share, on the day appointed for payment thereof, the Board may, at any time thereafter during such time as any part of the call or instalment remains unpaid or a judgement or decree in respect thereof remains unsatisfied in whole or in part, serve a notice on him requiring payment of so much of the call or instalment or other money as is unpaid, together with any interest which may have accrued and all expenses that may have been incurred by the Company by reason of non-payment.

42. The notice aforesaid shall:

(a) name a further day (not being earlier than the expiry of fourteen days from the date of service of the notice) on or before which the payment required by the notice is to be made; and

(b) state that, in the event of non-payment on or before the day so named, the shares in respect of which the call was made shall be liable to be forfeited.

43. If the requirements of any such notice as aforesaid are not complied with, any share in respect of which the notice has been given may, at any time thereafter, before the payment required by the notice has been made, be forfeited by a resolution of the Board to that effect.

44. Neither the receipt by the Company for a portion of any money which may from time to time be due from any member in respect of his shares, nor any indulgence that may be granted by the Company in respect of payment of any such money, shall preclude the Company from thereafter proceeding to enforce a forfeiture in respect of such shares as herein provided. Such forfeiture shall include all dividends declared or any other moneys payable in respect of the forfeited shares and not actually paid before the forfeiture.

45. When any share shall have been so forfeited, notice of the forfeiture shall be given to the defaulting member and an entry of the forfeiture with the date thereof, shall forthwith be made in the register of members but no forfeiture shall be invalidated by any omission or neglect or any failure to give such notice or make such entry as aforesaid.

46. The forfeiture of a share shall involve extinction at the time of forfeiture, of all interest in and all claims and demands against the Company, in respect of the share and all other rights incidental to the share.

47. (1) A forfeited share shall be deemed to be the property of the Company and may be sold or re-allotted or otherwise disposed of either to the person who was before such forfeiture the holder thereof or entitled thereto or to any other person on such terms and in such manner as the Board thinks fit.

(2) At any time before a sale, re-allotment or disposal as aforesaid, the Board may cancel the forfeiture on such terms as it thinks fit.

48. (1) A person whose shares have been forfeited shall cease to be a member in respect of the forfeited shares, but shall, notwithstanding the forfeiture, remain liable to pay, and shall pay, to the Company all monies which, at the date of forfeiture, were presently payable by him to the Company in respect of the shares.

(2) All such monies payable shall be paid together with interest thereon at such rate as the Board may determine, from the time of forfeiture until payment or realisation. The Board may, if it thinks fit, but without being under any obligation to do so, enforce the payment of the whole or any portion of the monies due, without any allowance for the value of the shares at the time of forfeiture or waive payment in whole or in part.

(3) The liability of such person shall cease if and when the Company shall have received payment in full of all such monies

in respect of the shares.

49. (1) A duly verified declaration in writing that the declarant is a director, the manager or the secretary of the Company, and that a share in the Company has been duly forfeited on a date stated in the declaration, shall be conclusive evidence of the facts therein stated as against all persons claiming to be entitled to the share;

(2) The Company may receive the consideration, if any, given for the share on any sale, re-allotment or disposal thereof and may execute a transfer of the share in favour of the person to whom the share is sold or disposed of;

(3) The transferee shall thereupon be registered as the holder of the share; and

(4) The transferee shall not be bound to see to the application of the purchase money, if any, nor shall his title to the share be affected by any irregularity or invalidity in the proceedings in reference to the forfeiture, sale, re-allotment or disposal of the share.

50. Upon any sale after forfeiture or for enforcing a lien in exercise of the powers hereinabove given, the Board may, if necessary, appoint some person to execute an instrument for transfer of the shares sold and cause the purchaser's name to be entered in the register of members in respect of the shares sold and after his name has been entered in the register of members in respect of such shares the validity of the sale shall not be impeached by any person.

51. Upon any sale, re-allotment or other disposal under the provisions of the preceding Articles, the certificate(s), if any, originally issued in respect of the relative shares shall (unless the same shall on demand by the Company has been previously surrendered to it by the defaulting member) stand cancelled and become null and void and be of no effect, and the Board shall be entitled to issue a duplicate certificate(s) in respect of the said shares to the person(s) entitled thereto.

52. The Board may, subject to the provisions of the Act, accept a surrender of any share from or by any member desirous of surrendering them on such terms as they think fit.

53. The provisions of these Articles as to forfeiture shall apply in the case of non-payment of any sum which, by the terms of issue of a share, becomes payable at a fixed time, whether on account of the nominal value of the share or by way of premium, as if the same had been payable by virtue of a call duly made and notified.

54. The provisions of these Articles relating to forfeiture of shares shall *mutatis mutandis* apply to any other securities including debentures of the Company.

(a) the holders of stock may transfer the same or any part thereof in the same manner as, and subject to the same Articles under which, the shares from which the stock arose might before the conversion have been transferred, or as near thereto as circumstances admit:

Provided that the Board may, from time to time, fix the minimum amount of stock transferable, so, however, that such minimum shall not exceed the nominal amount of the shares from which the stock arose;

(b) the holders of stock shall, according to the amount of stock held by them, have the same rights, privileges and advantages as regards dividends, voting at meetings of the Company, and other matters, as if they held the shares from which the stock arose; but no such privilege or advantage (except participation in the dividends and profits of the Company and in the assets on winding up) shall be conferred by an amount of stock which would not, if existing in shares, have conferred that privilege or advantage;

(c) such of these Articles of the Company as are applicable to paid-up shares shall apply to stock and the words “share” and “shareholder”/“member” shall include “stock” and “stock-holder” respectively.

57. The Company may, by resolution as prescribed by the Act, reduce in any manner and in accordance with the provisions of the Act and the Rules, —

- (a) The joint-holders of any share shall be liable severally as well as jointly for and in respect of all calls or instalments and other payments which ought to be made in respect of such share.

- (d) Only the person whose name stands first in the register of members as one of the joint-holders of any share shall be entitled to the delivery of certificate, if any, relating to such share or to receive notice (which term shall be deemed to include all relevant documents) and any notice served on or sent to such person shall be deemed service on all the joint-holders.
- (i) Any one of two or more joint-holders may vote at any meeting either personally or by attorney or by proxy in respect of such shares as if he were solely entitled thereto and if more than one of such joint holders be present at any meeting personally or by proxy or by attorney then that one of such persons so present whose name stands first or higher (as the case may be) on the register in respect of such shares shall alone be entitled to vote in respect thereof.
